

# TAKING GIANT QUALITY STRIDES IN MEDICAL DOMAIN

Quality is an attitude to achieve perfection. Currently, in the midst of a high tide of concern and clamour for taking urgent action to improve the standards of the medical education in the country, the significance of medical education in delivering quality healthcare is assuming greater importance. Many stakeholders have realised that without addressing quality medical education, improving healthcare delivery is not possible.

RajaRajeswari Medical College and Hospital realised the need to take up several quality initiatives at the beginning of 2013 itself. It believed that in order to deliver quality health care systems, they have to provide quality inputs.

Recently RajaRajeswari Medical College and Hospital, as well as RajaRajeswari Dental College and Hospital was recognised by the International Accreditation

**A.C. Shanmugam**  
*Chairman*

Organization, Houston, US, for achievement of highest standards in quality. RajaRajeswari Medical College and Hospital has achieved NAAC 'A' Grade accreditation and the journey so far for this 8-year-old institution has been very rewarding.

Today, we must re-look at the system so that a larger proportion of the academia in India can also engage

in research activity that directly contributes to continuous quality improvement in the educational processes. With its ultra sophisticated Central Research Lab, a facility that provides centralised clinical research infrastructure to benefit investigators in multiple disciplines across college and hospital, RajaRajeswari Medical College and Hospital is leaving no stone unturned to carve a niche in the Quality Health care Education and Delivery segment.

With their relentless approach, the institution is the only medical college and hospital in Karnataka to get ISO 9001:2008 certification for both medical education and health care delivery systems.

It is a dream for the institution to make RajaRajeswari Medical College and Hospital a one-stop health destination, where apart from education & services, a holistic treatment is offered to all their patients.
